

## NEOMAMMA STRETCH MARKS CREAM

To combat the formation of stretch marks

### HOW IT WORKS

NeoMamma Stretch Marks Cream is a specific skin tonic and elasticizing treatment that helps prevent and reduce the appearance of stretch marks during and after pregnancy. It will, in fact, help to counteract the relaxation of the skin tissues and restore tone and elasticity to the skin, especially in the most critical areas, such as the stomach, bust and hips. The heart of the formulation is F.R.V. (a mix of plant extracts of milk thistle, alchemilla, horsetail, soy peptides, wheat, alfalfa and radish), which helps improve tone and elasticity of the skin. The formula also contains alpha-hydroxy acids (sweet fruit acids) that provide a smoothing and regenerating effect, sweet almond oil and shea butter, which nourish skin and keep it hydrated.

### WHEN TO USE IT

During and after pregnancy, to reduce the risk of stretch marks.

### HOW TO USE IT

Apply several times a day on the stomach, bust and body. Massage until completely absorbed.

### WHAT IT CONTAINS

F.R.V. (Vegetal Firming Factor), alpha-hydroxy acids, sweet almond oil, shea butter.
