Gincosa

Capsules to improve alertness, concentration and intellectual vitality

Properties

The effects of the standardized extracts contained in GINCOSAN and obtained from the leaves of the Ginkgo biloba tree (extract GK501) and the roots of Panax ainsena (extract G115) complement one another.

The standardized Ginkgo extract GK501 has a positive effect on the brain circulation and the small blood vessels (arterioles and venules).

The standardized Ginseng extract G115 has a stimulant effect on the brain function.

The combination of these two extracts makes GINCOSAN a preparation indicated for the treatment of disorders due to deficient circulation.

Indications

Declining mental capacity, lack of concentration and attention, poor memory.

In case of arteriosclerotic symptoms such as dizziness, forgetfulness, changing mood, difficulties of adaptation and contact.

Contraindications

If taken as instructed, no contraindications are known until today.

Side effects

If taken as instructed, no serious side effects are known until today.
