

Solcoseryl® is an extract from the blood of young calves, free from protein and antigen. It is non-toxic. Solcoseryl® improves the utilization of oxygen and promotes the absorption of essential metabolites. The reparative and regenerative actions of Solcoseryl® are outstanding and it finds wide application in the treatment of ulcers of various etiology.

The formulation of Solcoseryl® for the Eye Gel has been developed for the treatment of diseases of the cornea and conjunctiva. Apply the 20 % Gel by letting a drop fall directly from the tube into the eye. Solcoseryl® Eye Gel has excellent wetting properties and adheres for a long time.
