PURIGEL® NF

COOLING AND HEALING GEL FOR ITCHINESS AND SUNBURN

Ingredients (INCI):

Aqua, Alcohol, Panthenol, Benzyl alcohol, Acrylates/C10-30 alkyl acrylate crosspolymer, Menthyl lactate, Triethanolamine, Chamomilla Recutita Flower Extract, Arnica Montana Flower Extract, Menthol, Disodium EDTA.

Properties:

PURIGEL® NF is a gel giving a pleasant and cooling sensation.

The gel is composed of hypoallergenic constituents with the same pH as the skin's (pH: 5.5).

The gel contains 1 % chamomile extract, 1 % arnica extract and 2 % dexpanthenol.

Matricaria chamomilla or real chamomile is a plant that has long been known for controlling itchiness and irritation of the skin.

Chamomile dry extract is highly concentrated and standardised to 5 % apigenins. It controls irritation, softens and relieves itchiness.

Arnica has been used for many years to support the regenerating properties of the skin.

Arnica liquid extract is standardised to 1 % polyphenols. It softens.

Dexpanthenol (provitamin B₅) has anti-itching and skin regenerating properties.

Menthol, Menthyl lactate & Benzylalcohol are used to cool and soothe itchiness.

Alcohol has a refreshing effect.

When should the product be used:

PURIGEL® NF is indicated in:

- redness, irritation, itchiness and insect bites

Instructions for use:

Apply several times a day, rub in gently until absorbed.

Precautions:

PURIGEL® NF must not be used on open wounds.

Avoid contact with the eyes, mouth and mucous membranes.
