SIDE EFFECTS

As with any active product, this drug may cause some side effects. Consult your physician.

DIRECTIONS FOR USE

As directed by the physician.
For intravenous or intra-arterial
infusion.

PRECAUTIONS

Regular hematological monitoring.
Déticène should be stored up to
25° C and protected from light.
After dilution, the solution for
infusion must be used immediately.
Déticène should preferably be
introduced into infusion bottle
rather than into the intravenous
set.

During infusion, bottle and
tubing must be kept away from
heat and light.
