

Healin B[®] Scar

Herbal Ointment
Effective in cutaneous scars

What is Healin B Scar?

Healin B Scar is a natural herbal ointment with no added preservatives, coloring agents or fragrance. It is composed of cactus extracts, sesame oil and beeswax. Those components are rich in linoleic acid, phytosterol, vitamin E and tyramine.

How does it work?

Healin B Scar provides the natural elements to restore color and texture of scarred skin, with a high safety profile. Thanks to its well-selected herbal extracts, **Healin B Scar** acts on the scar tissue to:

- Provide physiological moisture necessary for tissue remodeling.
- Promote remodeling of scars by enhancing microcirculation and encouraging collagen re-production.
- Smooth out structural wrinkles and enhance elasticity.
- Protect the scarred skin against UV lights and the damaging effect of free radicals.
- Lighten hyperpigmentation, normalizing skin color.
- Provide local nutrition to promote regeneration of skin and skin appendages.

Where to use Healin B Scar?

Healin B Scar is ideal for cutaneous scars. The younger the scar age, the better the results are.

The following respond to **Healin B Scar**:

1. Post surgical scars
2. Post traumatic scars
3. Burn scars
4. Acne scars
5. Chicken pox scars
6. Pigmentation marks
7. Stretch marks
8. Scars following tattoo removal
9. Hypertrophic scars
10. Scars secondary to skin infections, chemical burns or scalds.

How to use Healin B Scar?

For new scars: Please observe the color of the scar carefully before using the ointment. Apply **Healin B Scar** to the scarred skin in a thin layer. Use 3-4 times daily for 2-3 days. Note the lightening in the scar tissue color. Keep using till the scarred skin becomes smooth and soft. For better results, the earlier the better.

General application: Apply **Healin B Scar** in a thin layer 3-4 times daily. Massage the scarred area lightly for 5-10 minutes (Do not massage newly healed wounds). Tissue remodeling usually starts to be obvious after three months of application and cells nourishment. Further application, up to six months, is recommended for optimal results.

For scar formed after healing of traumatic and surgical wounds:

Apply **Healin B Scar** on to the scarred area (2-4mm thick). Use bandage with some pressure when necessary and repeat the process everyday. Please consult the doctor in case of stubborn scars. If the surface has ulcer, use **Healin B** ointment.

Any side effects?

Being purely natural in origin, **Healin B Scar** is non irritating and safe. No side effects have been reported so far, except for rare mild hypersensitivity reactions to sesame oil.

How Supplied?

Tubes of 15 or 30 grams of ointment packed in a carton along with a leaflet.

**Store below 25°C.*
