

For malnutrition in energy with a low electrolyte content

# caloLipid

caloLipid is a protein-free, high-caloric and supplement with a low electrolyte content consisting of a special blend of fat and carbohydrates.

Food for special medical purposes.

## DEFINITION UND INDICATION:

caloLipid can be used for the dietary management of a wide range of conditions where a high energy, low fluid, low electrolyte diet is required such as disorders in protein and amino acids metabolism, renal disease, liver disease and catabolic states. caloLipid is suitable for the dietary management of infants, children and adults.

## DOSAGE AND USE:

The daily amount of caloLipid depends on age, body weight and individual metabolic situation. The dosage of caloLipid is to be monitored and adjusted by the physician regularly.

Pour required volume of hot previously boiled water (cooled down to 50°C) into a feeding bottle. Add measured amount of caloLipid and, if applicable, protein/ amino acids, close the bottle and shake well until the powder dissolves. Before feeding, ensure that the formula is at the correct temperature by placing a few drops on the inside of your wrist. Prepare bottle-feed always fresh and discard unfinished feeds. caloLipid can be used to fortify a wide variety of beverages, fruit preparations and other food.

**Standard dilution:** 10,g caloLipid + 90 ml water

Please watch dental care, especially before bedtime

## STORAGE:

The tin, which is packed in a protective atmosphere, should be stored in a cool, dry place. Once opened, the tin should be tightly resealed after each use and the content should be used within 4 weeks.

## IMPORTANT NOTICE:

- Not suitable as a sole source of nutrition
- Must be used under medical supervision
- Not suitable for parenteral use

## INGREDIENTS:

Maltodextrin, vegetable fats and oils (Palm oil, rapeseed oil, Palm kernel oil, sunflower oil), emulsifier E472c and lecithin, antioxidants Ascorbyl palmitate and Tocopherol-rich extract.  
May contain traces of milk.
