

**SEPTA<sup>®</sup>**  
**Nasal Spray**

**INFORMATION ABOUT SEPTA**

SEPTA nasal spray contains 0.01% Chlorhexidine digluconate.

Chlorhexidine digluconate is a broad-spectrum antimicrobial with demonstrated activity against both gram-positive and gram-negative bacteria, yeasts, and viruses.

SEPTA nasal spray is used for the following conditions:

- To prevent infections in the throat and nasal passages
- To prevent the spread of coronavirus and other types of viruses and bacteria especially in high risk areas like hospitals and clinics
- To clean the nasal mucous membrane from dust and allergens
- To improve the protective properties of the mucous membrane
- To maintain daily hygiene of nasal cavity
- To prevent complications after nasal surgeries

**DIRECTIONS FOR USE**

1 or 2 sprays into each nostril, 3 or 4 times daily.

- Blow your nose gently to clear nasal passages before using SEPTA nasal spray.
- Do not use on children less than 2 years old.

**TAKE SPECIAL CARE WITH SEPTA**

- This product is for external (nasal) use only. Avoid contact with the ears and eyes. If contact occurs, rinse eyes thoroughly with water.
- No special precautions are recommended in case of pregnancy or lactation.

**STORAGE**

Store at controlled room temperature (up to 25°C), protected from light and humidity, beyond the reach of children. The expiry date is printed on the pack; don't use this product after this date.
