

DRAPOLENE™ CREAM

DRAPOLENE Cream is a specially formulated cream for the treatment of rashes in babies and children.

Composition

Benzalkonium chloride 0.01% Cetrimide 0.2% in a water miscible base.

Indications

Treats and prevents nappy rash. Provides soothing relief for minor burns and wounds.

Nappy rash

Babies having sensitive skin need extra care. The nappy area is particularly prone to rashes and even the best kept babies get Nappy Rashes and sore bottoms from time to time.

Nappy Rash is due to irritation of the skin by the chemical breakdown of urine through urine-splitting germs.

At first, the skin is spotty red and moist, later becoming thick and wrinkled, then peeling at the edges.

Other complicating infections may develop if the tender skin is left unattended. DRAPOLENE Cream contains two gentle, yet powerful antiseptics, which kill the urine-splitting germs.

DRAPOLENE Cream treats and prevents the infection whilst it soothes and brings relief to baby's tender skin.

Treatment

Change soiled nappies regularly. Wash and dry baby's bottom and apply DRAPOLENE Cream after every nappy change.

How to obtain the best results with Drapolene Cream

When applying DRAPOLENE Cream, spread evenly paying particular attention to the folds of the skin. It is important to make sure that the affected area is dry and free from all traces of soap.

Other uses

DRAPOLENE Cream also provides soothing relief for minor burns and wounds.

Contraindications

It is inadvisable to apply Drapolene Cream to a baby with an established hypersensitivity to benzalkonium chloride, cetrimide or lanolin.

Discontinue using the product if an allergic hypersensitivity reaction is suspected.

Special warning and precautions for use

Store below 25°C

For External use only

Keep out of reach of children

Drug Interactions

None Known.

Adverse effects

Allergic hypersensitivity reactions may occur in individuals who are sensitive to any of the components of Drapolene Cream.

Hypersensitivity to Lanolin is recognised but rare.

Overdose

There are no reports of adverse events resulting from excessive application or accidental ingestion of Drapolene Cream.

In cases of accidental ingestion, symptomatic treatment is appropriate.

Net weight is 55g.

THIS IS A MEDICINE

- Medicines are products that affect your health, and failure to follow the instructions may be dangerous to you.
- Follow your doctor's advice carefully, the method of use, and the instructions of the pharmacist who sold you the medicine.
- Your doctor and pharmacist are experts in the use of medicines, their benefits and their risks.
- Do not stop your course of treatment early unless being advised by your doctor or pharmacist.
- Do not repeat your prescription without consulting your doctor.
