

BioGaia®

Probiotic drops

Child Health

5 drops contain 100 million living *Lactobacillus reuteri* Protectis.
A product that naturally regulates the child's digestive system by restoring the normal balance of beneficial bacteria in the digestive system.

Indications: BioGaia Drops have shown clinical efficacy in controlling digestive disturbances' symptoms such as infants' colic and diarrhea besides other GI disturbances.

Active ingredient: 100 million live active *Lactobacillus reuteri* Protectis per 5 drops.

Other ingredients: Sunflower oil, medium chain triglyceride oil, silicon dioxide.

The drops do not contain preservatives.

Pregnancy and breastfeeding: The product can be used during pregnancy and breastfeeding.

Dosage:

For adults and children: 5 drops daily.

For infants: 5 drops daily diluted in a suitable drink or food
(or given directly into the mouth using a spoon).

The recommended dosage should not be exceeded.

Directions: Shake well before use. To dispense, turn the bottle upside down and the drops will form slowly. The drops may be given on a spoon or added to breast or formula milk, water or any other suitable drink. Do not add to hot food or drink as this may damage the live cultures. The drops do not change the taste of food or drink.

Storage: Should be stored in a refrigerator (2-8°C).

Keep out of reach of children.

FOOD SUPPLEMENT

A food supplement does not replace diversified food.

Patent: Protected by for example corresponding patents of WO86/08452 and other issued patents.
