Special precautions to be taken with cérulyse® 5g/100g, solution for auricular instillation:

Warnings

If the eardrum is opened, this medication can cause undesirable effects at the middle ear level.

AS A PRECAUTION MEASURE, before any administration, you should have the integrity of your eardrum checked by a doctor.

Interactions with other medicines and other interactions:

In order to prevent eventual interactions between several medicines, you must systematically inform your doctor or your pharmacist of any other pending treatment.

Pregnancy and breast-feeding:

Ask for advice to your doctor or your pharmacist before taking any medication.

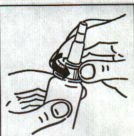

INSTRUCTIONS FOR THE USE OF cérulyse® 5g/100g, solution for auricular instillation

In order to avoid the cold solution's unpleasant contact in the ear, warming a little the bottle in your hand before the use.

Soft earplug: maintaining your head leaned to one side, instil several drops (ear bath), for about ten minutes, then wash the ear.

Hard earplug: during the 3 or 4 days preceding the extraction of the cerumen ear plug, carry out an ear bath, 3 times daily.

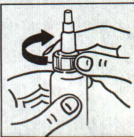

Maintain the bottle vertically after opening.

- 1- Unscrew completely the dropper-stopper which close the bottle.

- 2- Remove the seal situated inside the stopper by pushing firmly on the dropper.

- 3- Screw back again the dropper-stopper on the bottle.

- 4- Now, unscrew the colored cap covering the dropper, and install it again after use.
