

Vitascorbol[®] 500

ascorbic acid

COMPOSITION :

Sweetened, lemon flavoured, buffered chewable tablets, each containing ascorbic acid and sodium ascorbate equivalent to 500 mg total ascorbic acid.

PRESENTATION :

Tube of 12 scored yellow tablets

PROPERTIES :

Vitascorbol 500 chewable tablets contain Vitamin C which is essential for the formation and maintenance of collagen and intercellular material and hence for the development of cartilage, bone and teeth, for healing of wounds, for the absorption and utilization of iron from the gastrointestinal tract, for the normal character of the cement substance of the vascular tissue and plays a very important role in strengthening body immunity. Vitamin C also favours corticosteroid secretion of adrenal glands (effort hormones).

INDICATIONS :

- Asthenia, over-exertion, muscular fatigue, convalescence, pregnancy, adrenal insufficiency.
- Infectious diseases (tuberculosis of the intestine and of the skin, whooping cough, diphtheria, influenza, and staphylococcal infection of the skin)
- Inflammatory periodontal infections, gingivitis, stomatitis (combined treatment : Vitamin C and Nicotinamide).
- Fractures, dystrophy (bone and teeth).
- Anaemia (deficiency, post-infectious).
- Chronic rheumatism.
- Purpura, hemogenia, hemophilia, internal or post operative hemorrhage.
- Scurvy, pre-scurvy : Barlow's disease.
- Senile cataract.
