

# Moov

## Massage Cream

### Composition:

Each 100 gm contains:

Oleoresin capsicum	0.042 gm.
Camphor	1.2 gm.
Menthol	1.21 gm.
Methyl salicylate	0.48 gm.
Oil of camphor	0.18 gm.

### Properties:

Moov Massage cream is a combination of oleoresin capsicum, camphor, methyl salicylate and oil of camphor, which have a counterirritant and rubefacient effect, while menthol causes dilatation of the blood vessels followed by a cold sensation causing an analgesic effect.

### Uses:

- For deep or superficial massage in all cases of muscular stiffness.
- Treatment of bruises, muscular strains and sprains, fibrositis, rheumatism (articular or non articular), arthritis, sciatica and lumbago.

### Dosage and Application:

- A little amount of the cream is spread on the painful area and rubbed gently for 5-10 minutes until complete absorption.
- Repeat application and rubbing daily as long as pain persists.
- Those who practice sports can use the cream before and after training to help muscle relaxation and relief of tenderness.

### Contraindications:

Hypersensitivity to any component of the cream.

### Precautions and warnings:

- Avoid contact with the eye.
- Not to be applied to broken skin.

### Storage:

Store between 15-30°C.  
Keep out of reach of children.

### Packing:

Tube of 40 gm.  
Tube of 100 gm.
