

DISGREN® (Triflusal)

Platelet aggregation inhibitor. Antithrombotic agent

Triflusal, the only active ingredient of DISGREN, is a molecule developed in the Uriach Research Centre.

Triflusal is a powerful ADP, adrenaline and collagen induced platelet aggregation inhibitor having a notable antithrombotic activity evidenced in pharmacological and clinical experience.

The anti-aggregant and antithrombotic activity of triflusal (DISGREN) is the physiological basis of its effectiveness in the prophylaxis and treatment of thromboembolic diseases and of all pathological processes which have originated in or developed with platelet hyperactivity.

COMPOSITION

Each capsule contains 300 mg of triflusal.

INDICATIONS

Platelet aggregation inhibitor. In the prevention and treatment of thromboembolic diseases or prevention of thrombotic complications of other diseases.

POSODOLOGY

One to three capsules per day according to medical prescription, preferably during or at the end of meals.

CONTRAINDICATIONS

DISGREN should not be used in patients with active gastrointestinal lesions, erosive gastritis, peptic ulcer or with a history of recurrent gastrointestinal lesions. DISGREN is also contraindicated in people with salicylates hypersensitivity.

USE DURING PREGNANCY AND LACTATION

Although there is no evidence of teratogenic effects, its use is not recommended during pregnancy or lactation.

INTERACTIONS

DISGREN should be administered with caution to patients receiving oral anticoagulants since it potentiates their action. DISGREN should potentiate the action of hypoglycaemic agents and a dosage reduction of the latter could be necessary.

UNDESIRABLE EFFECTS

Gastric troubles may appear but generally they disappear after administration of an anti-acid.

INTOXICATION AND TREATMENT

Management of triflusal overdose will be supportive and symptomatic. During the first 4 hours gastric lavage or repeated administration of activated charcoal will be helpful.

KEEP OUT OF THE REACH OF CHILDREN.

MEDICAL PRESCRIPTION REQUIRED.

Store below 25°C.

Keep the container tightly closed.
