

CALCIMAX SYRUP

Calcium Therapy with Vitamins B Complex and C

Presentation

Each 5ml contains:-

Calcium Levulinate HSE	0.35g
Calcium Chloride BP	0.12g
Nicotinamide BP	2.0mg
Riboflavine BP	0.125 mg
Thiamine Hydrochloride BP	0.5mg
Pyridoxine Hydrochloride BP	0.125mg
Ascorbic Acid BP	5.0mg
Calcium Pantothenate	0.125mg

Actions and Uses

Calcimax syrup presents in high concentration soluble Calcium Salts which are characterised by their low toxicity and absence of gastric irritation. Calcimax syrup provides more than 150mg of elemental Calcium in each 10ml dose in a readily absorbable form.

Vitamins of the B & C group are also present as it has been found that there is often a concomitant deficiency of these in calcium deficiency states.

Indications

The prevention and treatment of rachitism, faulty bone and dental growth.

Increased Calcium and Vitamin demand in adolescence, pregnancy, lactation, convalescence and old age.

Prophylaxis where there is a tendency to osteomalacia, spasmophilia, keratamalecia or xerophthalmia.

Anorexias

Hypersensitivity to injectable forms of calcium.

Dosage

Adults-Four 5ml spoonfuls twice per day or as directed by a doctor

Children-One or two 5ml spoonfuls three times per day according to age or as directed by a doctor.

The syrup should be taken in a little water or other liquid.

Interactions

Calcium enhances the effect of digitalis and reduces the absorption of tetracyclines.

Contraindications

Severe hypercalcaemia and hypercalciuria as in hyperparathyroiditis, decalcifying tumours, renal failure, immobility

Pack Size

150ml and 5 Litres

PL 0400/5007
