

ULTRA-LEVURE 200 CAPSULES

PHARMACEUTICAL FORM AND PRESENTATION:

Capsules, bottle of 10.

COMPOSITION:

- Lyophilized *Saccharomyces boulardii* 226 mg
(corresponding to 200 mg of yeast cells and 26 mg of lactose)
- Excipients: magnesium stearate q.s. for one capsule.

PROPRIETIES:

ANTIDIARRHEIC.

Replacement flora.

(A: digestive system and metabolism)

THERAPEUTICAL INDICATIONS:

- Treatment of acute infectious diarrhea of adults and children.
- Prevention and treatment of antibiotic-associated diarrhea and colitis.
- Addition to vancomycin/metronidazole-treatment to prevent recurrence of *Clostridium difficile* diseases.
- Prevention and treatment of tube-feeding associated diarrhea.
- Treatment of irritable bowel syndrome.

This treatment does not dispense with rehydration if it is necessary. The importance and the route of administration (oral or I.V.) should be fitted to the severity of the diarrhea and to the state of the patient.

PRECAUTIONS FOR USE:

As ULTRA-LEVURE consists of living cells, it should not be mixed with liquids or food that are too hot (more than 50°C), iced or alcoholic.

DRUG INTERACTIONS:

Because of its fungal nature, ULTRA-LEVURE should not be administered at the same time as an oral or systemic antifungal drug.

CONTRA-INDICATIONS:

- Hypersensitivity to one of the ingredients.
- Patients with a central venous catheter.

ROUTE AND METHOD OF ADMINISTRATION:

Oral route.

The capsules should be swallowed with a glass of water.

DOSAGE:

1 to 2 capsules, once or twice daily.

SIDE EFFECTS:

Some rare epigastric disturbances have been reported, not requiring that treatment be discontinued.

SPECIAL STORAGE CONDITIONS:

Store away from damp and heat.
