

ALGIN[®]

Analgesic/Antipyretic

Composition :

400 mg Paracetamol

50 mg Caffeine

DESCRIPTION : Algin is an analgesic and antipyretic agent

ACTIONS : Algin produces analgesia through its selective depressant action on the pain receptor in the central nervous system. Reduction of fever results by its direct effect on the hypothalamic heat-regulating center to produce peripheral vasodilation resulting in increase blood flow through the skin, sweating and heat loss. It is metabolized in the liver and excreted in the urine.

INDICATIONS : Algin is indicated for the relief of painful disorders such as simple headaches, minor muscular aches, and menstrual cramps. It is also indicated in conditions accompanied by discomfort and fever such as common colds and viral infections.

CONTRAINDICATIONS : Algin is contraindicated in patients with known hypersensitivity to the paracetamol & caffeine

DOSAGE & ADMINISTRATION :

As directed by physician

Availability :

Box of 10 SUPPO.
