

# Miconaz<sup>®</sup> Topical Gel

## Brand of Miconazole Nitrate, USP

### Antifungal

**DESCRIPTION:** *Miconaz<sup>®</sup>*, brand of miconazole nitrate, formulated into a gel intended for topical use against susceptible fungi.

**ACTIONS:** *Miconaz<sup>®</sup>* acts by inhibiting the growth of the common dermatophytes: *Trichophyton rubrum*, mentagrophytes, and *Epidermophyton floccosum* ; the yeast - like fungus, *Candida albicans* ; and the organism responsible for tinea versicolor (*Malassezia furfur*).

**INDICATIONS:** *Miconaz<sup>®</sup>* is indicated for the treatment of fungal infections of the skin in tinea pedis (athlete's foot), tinea corporis, tinea cruris, cutaneous candidiasis and tinea versicolor.

**CONTRAINDICATIONS:** Hypersensitivity to Miconazole nitrate.

**PRECAUTIONS:** Should a reaction suggesting chemical irritation or sensitivity develop, discontinue use immediately. Avoid contact with eyes.

- *Miconaz<sup>®</sup>* potentializes the effects of coumarin-type anticoagulants and of hypoglycaemic sulfamides, the anticoagulant level should be carefully monitored and adapted.

- *Miconaz<sup>®</sup>* may rise phenytoin-serum concentrations, it is advisable to monitor both levels if they are used concomitantly.

- Pregnancy and lactation: no evidence of teratogenic effects in animals, prescription during pregnancy should be outweighed with the expected benefits.

Caution should be applied when prescribing *Miconaz<sup>®</sup>* to nursing women.

**ADVERSE REACTIONS:** Skin rash, burning, redness and allergic contact dermatitis have occasionally been reported.
