

SEPTIDYNE®
Brand of Povidone Iodine, USP
Antiseptic

DESCRIPTION:

SEPTIDYNE® Topical Solution and **Scrub**, brands of Povidone Iodine are topical germicide and antiseptic agents.

PROPERTIES:

SEPTIDYNE® contains povidone iodine a complex that releases iodine to exert an effect against bacteria, yeasts, fungi, viruses, protozoa, cysts and spores.

SEPTIDYNE® preparations are considered to be less irritant and less toxic than iodine ones.

PHARMACOKINETICS:

Released iodine may pass through the skin and excreted in urine.

INDICATIONS:

SEPTIDYNE® preparations are used for preoperative skin preparation including the vagina; for disinfection of wounds, burns, lacerations and abrasions; for preoperative and postoperative scrubbing of hospital operating-room personnel and materials.

PRECAUTIONS:

Application of **SEPTIDYNE®** to denuded skin may produce the systemic adverse effects associated with iodine.

ADVERSE EFFECTS:

Rare hypersensitivity reactions may occur.

DOSAGE & INSTRUCTIONS OF USE:

- **SEPTIDYNE® Topical Solution 10%:** Apply full strength to the affected area as often as needed.
- **SEPTIDYNE® Scrub 7.5%:**
 - * For pre-operative scrubbing for operating-room personnel: Wet hands and forearms. Spread about 5cc (teaspoonful) of **SEPTIDYNE® Scrub** over both hands and forearms. Scrub well, using a brush if desired, for about 5 minutes. Lather with water and rinse thoroughly. Repeat procedure.
 - * For pre-operative prepping of patients: Wet shaved area with water. Apply a sufficient amount to work up a lather. Scrub well for about 5 minutes. Rinse off using sterile gauze. Paint area with **SEPTIDYNE® Scrub** and allow to dry.
 - * For general use: Wet hands. Apply a sufficient amount and work up a lather. Rub well. Rinse

DRUG INTERACTIONS:

Should not be used concomitantly with other antiseptics.
