

ALGICREM® Cream
Analgesic / Rubefacient

DESCRIPTION:

A smooth cream with characteristic odor.

ALGICREM® is an (analgesic and rubefacient) smooth cream with characteristic odour.

ACTIONS:

ALGICREM® combines the counter-irritant and rubefacient properties of Capsicum, Camphor and Menthol with the analgesic properties of diethylamine salicylate.

INDICATIONS:

ALGICREM® is indicated for the temporary relief of pain associated with musculoskeletal soreness and discomfort. Also as a topical adjunct in arthritis, rheumatism and bursitis.

CONTRAINDICATIONS:

ALGICREM® is contraindicated in patients with aspirin or salicylate idiosyncrasy.

WARNINGS:

Use only as directed. Do not use excessive amounts. Keep away from eyes.
FOR EXTERNAL USE ONLY.

ADVERSE REACTIONS:

Mostly related to excessive dosage of salicylates and menthol and include irritation, tinnitus, nausea or vomiting.

DOSAGE & ADMINISTRATIONS:

Gently massage a thin layer into the sore or painful area until the cream vanishes and the skin becomes dry. May be repeated often as needed.
