

HYDROSONE®
Brand of Hydrocortisone Acetate, USP
Topical Corticosteroid

DESCRIPTION:

HYDROSONE®, brand of hydrocortisone acetate, is a topical adrenocorticoid possessing anti-inflammatory, antipruritic and vasoconstrictive properties.

ACTIONS:

HYDROSONE®, produces a rapid response in inflammatory dermatoses responsive to topical corticosteroid therapy. It relieves itching and discomfort arising from irritated skin as well as helps reduce hyperemia and swelling.

INDICATIONS:

HYDROSONE®, is indicated for the topical treatment of psoriasis, anal and vulval pruritus and allergic dermatitis. Also in the management of insect bites and otitis external (only if eardrum is intact). **HYDROSONE®** may be used in rheumatologic pathologies (arthritis...) and in phlebitis.

CONTRAINDICATIONS:

Skin infections caused by herpes simplex, chicken pox, candida or bacteria (impetigo). Eczema. Also hypersensitivity to any of the components.

PRECAUTIONS:

Long-term continuous topical use may lead to atrophic changes especially in the face. Avoid contact with eyes. If irritation develop discontinue use immediately.

FOR EXTERNAL USE ONLY.

ADVERSE REACTIONS:

Burning, itching, irritation, acneiform eruptions, secondary infection, skin atrophy, allergic contact dermatitis have been reported especially when occlusive dressing is used.

DOSAGE & ADMINISTRATION:

Apply a small quantity to affected area 2 - 3 times daily.
