

# Airtal Difucrem 1.5%

## Cream Aceclofenac

### Composition per 100 g of cream:

Aceclofenac (INN).....1.5g  
Excipients: emulsifying wax 10g; liquid paraffin 4g; methyl p-hydroxybenzoate 0.2g;  
propyl p-hydroxybenzoate 0.05g; purified water s.q.

### Pharmaceutical form and contents

Cream for cutaneous use. Tube of 60 g of cream (1.5%).

### Properties

Aceclofenac possesses analgesic, anti-inflammatory and antirheumatic activity.  
Administration of aceclofenac in the form of cream allows the local treatment of painful and inflammatory processes.

### Indications

All types of local inflammatory and painful processes, including traumatism and acute or chronic musculoskeletal inflammatory pathologies such as tendinitis, tenosynovitis, sprains, luxations, peri-arthritis, distensions, lumbago and torticollis.

### Contraindications

Not to be applied to patients that have shown hypersensitivity to aceclofenac or other non-steroid anti-inflammatory drugs, including acetylsalicylic acid.

### Interactions

No interactions of Airtal Difucrem with other drugs are known.

### Warnings

#### Pregnancy and lactation

Its use is not recommended in nursing or pregnant women, as its safety has not yet been established.

#### Effects on ability to drive

The application of Airtal Difucrem does not have any effect on this capacity.

#### Use in elderly

Treatment with Airtal Difucrem does not require any special precautions.

#### Use in children

The recommended dosage and indications for children have not yet been established.

### Dosage and administration

Topically apply from 1.5-2 g of cream, depending on the extension of the affected area, three times a day and gently massage.

### Overdose

No overdosage has yet been reported. In the event of massive accidental ingestion, symptomatic treatment should be initiated.

### Undesirable effects

In some cases moderate or mild irritation, reddening and pruritus may occur. These symptoms disappear with the interruption of treatment.  
If you notice any side effects not mentioned in this leaflet, please inform your doctor or pharmacist.

### Shelf life

Do not use this drug after the expiry date given on the package.

### Other pharmaceutical forms

Airtal Tablets: Packages of 10, 20, 40 and 100 tablets.

Airtal Injection: Package of 4 freeze-dried vials and 4 ampoules of solvent.

Neither all presentations nor all pharmaceutical forms are available in all markets.

### Under medical prescription

### Keep out of the reach of children
