

# Agiolax<sup>®</sup>

Granules

## MADAUS

Plant preparation for regulating bowel function.

Important information, please read carefully!

### Composition:

100 g of the granules contain

Seeds of <i>Plantago ovata</i>	52.0 g
Isapgula husk	2.2 g
Tinnevely Senna pods	12.4 g

### Properties:

Agiolax regulates the functioning of the bowel in a natural way. Its action is based on vegetable mucilages which swell up on contact with water to produce a soft and easily passed stool. The senna pods have a supplementary effect in cases where the bowels tend to be sluggish.

Agiolax does not cause any undesirable side-effects.

### Area of indications:

Acute and chronic constipation

It is particularly suitable for bowel regulation in bed-ridden patients, during pregnancy and post partum. It is also useful for ensuring painfree evacuation in cases of haemorrhoids.

M. NR. 226 303 (Dose 226 323)

### Dosage and administration:

Agiolax should be swallowed, chewed with a sufficient amount of fluid, e.g. in the evening a cup of tea or in the morning a glass of cold water. Unless otherwise directed by the doctor we recommend the following dosages:

#### Adults:

Every evening after supper and, if required, also in the morning before breakfast 1 teaspoonful of Agiolax. In obstinate cases: 1 teaspoonful of Agiolax every 6 hours for 1-3 days.

#### Children:

School children - 1 teaspoonful of Agiolax daily; 12 years and upwards - dosage as for adults.

**Pregnant women:** 1 teaspoonful of Agiolax every morning or every evening.

### Incompatibilities and risks:

In cases of intestinal obstruction (ileus), Agiolax - like any other laxative - is contra-indicated.

In cases of permanent constipation the cause has to be cleared up by the doctor.

### Presentation form and package size:

Pack of 250 g granules

**Store medicines carefully out of the reach of children!**

Available only in pharmacies. Contents 250 g granules
