2. What you need to know before you take Bebemol
3. How to take Bebemol
4. Possible side effects
5. How to store Bebemol®
6. Contents of the pack and other information

#### 1. What Bebemol is and what it is used for

Bebemol contains the active substances: zinc oxide and titanium dioxide in an ointment base. Bebemol shows a mild astringent soothing and protective action when applied on the skin. Bebemol is indicated in case of itching and discomfort arising from irritating tissues including diaper rash.

#### 2. What you need to know before you take Bebemol Do not take Bebemol:

- Hypersensitivity to any of the ingredients listed in section 6;
- Oozing lesions ;
- Secondary infection lesions

#### Warnings and precautions:

This medicine is not a preventive treatment for diaper rash.

## FOR EXTERNAL USE ONLY.

### Other medicines and Bebemol:

The data available to date does not suggest the existence of clinically significant interactions.

### Pregnancy and breast-feeding:

If you are pregnant or breast-feeding, think you may be pregnant or are planning to have a baby, ask your doctor or pharmacist for advice before taking this medicine.

Do not apply to the breasts during breastfeeding because of the risk of ingestion of the product by the newborn .

### 3. How to take Bebemol

Clean the area to be treated before application. Apply a thin layer and massage to rub the ointment. Apply a sufficient quantity to the affected area as often as needed.

The redness of the buttocks of the infant is often due to accumulation of urine in the diaper causing irritation of the skin; it is therefore necessary to clean and rinse the skin with water before applying the medication.

### 4. Possible side effects

No side effects have been reported while using this medicine. If you get any side effects, talk to your doctor or pharmacist.

### 5. How to store Bebemol

- Keep this medicine out of sight and reach of children.
  - Do not use this medicine after the expiry date, which is stated on the carton.
  - Bebemol® should be stored in its original pack in order to protect from light and moisture.
  - Store below 30 °C.
  - Do not throw away any medicines via wastewater or household waste. Ask your pharmacist how to throw away medicines you no longer use.
- These measures will help to protect the environment.
