

# MICOZOLE

## Oral Gel

### Fungicidal and Bactericidal

**Composition:**

Each 100 g of the oral gel contains:

Miconazole 2 g

**Excepients:**

Sorbitol Solution (70%), Glycerin, Carboxymethyl cellulose sodium, Sodium benzoate, Orange oil, Citric acid monohydrate, Purified water.

**Properties:**

• **Micozole Oral Gel** contains "Miconazole", a synthetic imidazole derivative, which has strong fungicidal and bactericidal activities. Its antifungal spectrum includes dermatophytes, *Candida albicans* and other *Candida* species, as well as dimorphic fungi. Miconazole is also effective against some gram positive bacilli and cocci.

Accordingly, Micozole oral gel is effective in the treatment of common infections of the oral cavity as well as intestinal infections caused by susceptible organisms such as *Candida albicans*.

• **Miconazole** is poorly absorbed from the gastro-intestinal tract so that the desired local antifungal and antibacterial actions are exerted in the buccal cavity and the gastro-intestinal tract without any systemic side effects.

• **Micozole Oral Gel** is specially formulated for oral use to adhere to the mucosal linings of the bucco-pharyngeal cavity and the gastro-intestinal tract so that high fungicidal concentrations are maintained as long as possible to obtain maximal cure rates.

**Indications:**

Curative and prophylactic treatment of oral, pharyngeal, esophageal and intestinal candidiasis.

**Adverse reactions:**

Mild Gastro-intestinal disturbances and in rare cases allergic reactions may be observed.

**Contraindications:**

Known hypersensitivity to Miconazole.

**Dosage and administration:**

**Infants:** ¼ teaspoonful (1.25 ml.) four times daily.

**Children and Adults:** ½ teaspoonful (2.5 ml.) four times daily.

• The enclosed graduated teaspoon should be used for accurate dose delivering.

• The gel should be kept in the mouth as long as possible before being swallowed. Treatment should be continued at least for one week after the symptoms have disappeared.

**How supplied:**

In collapsible tubes, each contains 20g of oral gel, accompanied by a measuring teaspoon.

**Storage conditions:**

Store at a temperature not exceeding 30°C.

Keep out of reach of children.
