

vitexD3

helps to maintain healthy
bones and teeth

Features and benefits:

- Prevention or treatment of vitamin D deficiency
- Vitamin D3 is longer lasting and more effective at raising vitamin D levels in the blood than vitamin D2
- Helps to improve absorption of calcium and phosphate which are essential for healthy bones
- Helps to maintain healthy bone density by providing minerals to the skeleton
- Helps to build and maintain muscle strength in older people, which may reduce risk of falls

Each capsule contains: Colecalciferol (Vitamin D3) - 10,000 IU		
NON-ACTIVE INGREDIENTS: Calcium hydrogen phosphate, Cellulose - microcrystalline, Silica - colloidal anhydrous, and, Magnesium stearate		
Directions for use: Oral: take one capsule daily, or as directed by a physician.	Dosage form: Capsule - hard	Pack form: 30 Capsules

Therapeutic indications:

Vitamin D supplementation may assist in optimal regulation of calcium and phosphate homeostasis and bone mineralisation in those not obtaining sufficient vitamin D. Vitamin D supplementation may assist in the absorption of dietary calcium in those not obtaining sufficient vitamin D. Vitamin D may assist with muscle function and strength in those not obtaining sufficient vitamin D. May reduce hip and other nonvertebral fractures when given with adequate supplemental calcium in subjects deficient in vitamin D, such as the housebound, immobilised and institutionalised elderly population, or in subjects diagnosed with vitamin D deficiency due to malnutrition and/or malabsorption. It is of benefit to anyone who is at risk of vitamin D deficiency due to limited exposure to sunlight, in particular the elderly, those who wear full or partial body covering for cultural/ religious reasons; or those who work in occupations that prevent exposure to sunlight.

Contraindications:

Patients with hypercalcaemia, vitamin D toxicity, or hypersensitivity to vitamin D or any of the non-active ingredients.

Precautions:

Vitamin D supplementation should be given with care to patients with impaired renal function or calculi or heart disease who might be at increased risk of organ damage if hypercalcaemia occurred.

No added salt, yeast, gluten, preservatives or artificial flavours ■ This product should be stored in a cool dry place away from direct sunlight ■ Vitamin supplement can only be of assistance if dietary vitamin intake is inadequate ■ Pregnant or lactating women should consult a healthcare professional before using this product ■ Always read the label and use only as directed.
