

APIX PROPOLI BALSAMIC SYRUP

A deep breath of relief

HOW IT WORKS

APIX PROPOLI balsamic syrup helps rid the airways from excess mucus and provide relief from coughs. All thanks to the effect of **propolis** and **grapefruit seeds**, the fluidifying properties of ivy, rich in saponins, the emollient virtues of plantain, rich in mucilage, of **zinc** which favours natural organism defenses, and finally the balsamic properties of the **essential oils of eucalyptus** and mountain **pine**.

WHEN TO USE IT

To facilitate the physiological elimination of mucus in the upper airways and provide relief from dry and spasmodic coughs.

HOW TO USE IT

For adults we recommend one 10 ml dose, 3 times a day. For children, the dose should be reduced to 5 ml, twice a day. The product can be taken neat or diluted in another liquid (water, tea, infusion). The fruits of the forest flavour makes it palatable.

WHAT IT CONTAINS

Extracts of ivy leaves, propolis resin, grapefruit seeds and plantain (Sedox), essential oils of eucalyptus and mountain pine.

NOTES

No gluten, colourants or alcohol.

PACK

150 ml (190 g)
