

ICHTAMMOL 10% OINTMENT

Drawing Salve and Anti-infectant

Active Ingredients: Ichtammol 10%

Inactive Ingredients: Methylparaben, White Petrolatum

Description: Ichtammol has a very stiff consistency and is almost black in color.

Indication: Ichtammol is an anti-infective ointment, which also serves as skin protective ointment. As a drawing salve, Ichtammol softens the skin around the foreign body, and assist the natural rejection. Also helps to prevent the spread of infection. Ichtammol aids in relieving the discomfort of minor skin irritations, superficial cuts, scratches and wounds. Ichtammol is also helpful in the treatment of boils and carbuncles. Ichtammol has been used with some success in the treatment of acne and furunculosis as well as other skin disorders.

Warning : When applied to fingers or toes, do not use a bandage; use loose gauze so as to not interfere with circulation. Apply according to directions for use and in no case to large areas of the body without a physician's direction .

Keep out of eyes.

Caution: if Ichtammol ointment is not effective in 10 days, see your physician.

Directions For Use: Wash affected parts thoroughly with hot water; dry and apply Ichtammol at least twice daily on a clean bandage or gauze . After irritation subsides, repeat application once a day for several days. Do not irritate by squeezing or pressing skin area.

How Supplied: Ichtammol is packaged in 15 g. Aluminium tube.
